

2.3 (Ternio)

Integration, Lebesgue and Riemann

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4 (Ternio)

2.4.1 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.2 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.3 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.4 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.5 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.6 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.7 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.8 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.9 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.10 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.11 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.

2.4.12 (Ternio)

Let $f: [a, b] \rightarrow \mathbb{R}$ be a function. Then f is Riemann integrable iff f is Lebesgue integrable and $\int_a^b f(x) dx = \int_a^b f(x) d\mu$.
